Indicatori metrici delle riviste in cui è pubblicato lo Scholarly Output.

Sono tutte indicate come “publication year”. Il valore visualizzato corrisponde a quello relativo all’anno di pubblicazione del singolo Scholarly Output

Per conoscere nel dettaglio gli indicatori delle riviste è possibile scaricare un file excel da Scopus (di seguito) o selezionare la rivista nella sezione Scopus Sources

L’indicatore **Prominence** combina 3 metriche per indicare il momentum del topic:

- n° citazioni nell’anno Y per le pubblicazioni pubblicate nell’anno Y e Y-1
- n° visualizzazioni in Scopus nell’anno Y per le pubblicazioni pubblicate nell’anno Y e Y-1
- Cite Score medio per l’anno Y

Publications in Top Journal Percentiles (manuale Research Metrics Guidebook)

Publications in Top Journal Percentiles in SciVal indicates the extent to which an entity's publications are present in the most-cited journals in the data universe. The CiteScore, SNIP or SJR values at the thresholds of the top 1%, 5%, 10% and 25% most-cited journals in Scopus per Publication Year are calculated.

This metric is useful to:

- Showcase the presence of publications in journals that are likely to be perceived as the most prestigious in the world*
- Benchmark entities even if they have different sizes and disciplinary profiles*

This metric should be used with care when:

The objective is to judge an entity's publications based on their actual performance, rather than based on the average of a journal:

- A publication may appear in a journal with a very high CiteScore, SNIP or SJR value, and not itself receive any citations; even the most highly cited journals in the world contain publications that have never been cited.*
- A publication may be very influential and have received many citations, without being published in a journal with a high CiteScore, SNIP or SJR value; journals which do not rank very highly in the data universe may still contain very highly cited publications.*
